

AeroSaverTM1

One-Piece Aerodynamic Side Skirt

NEW!

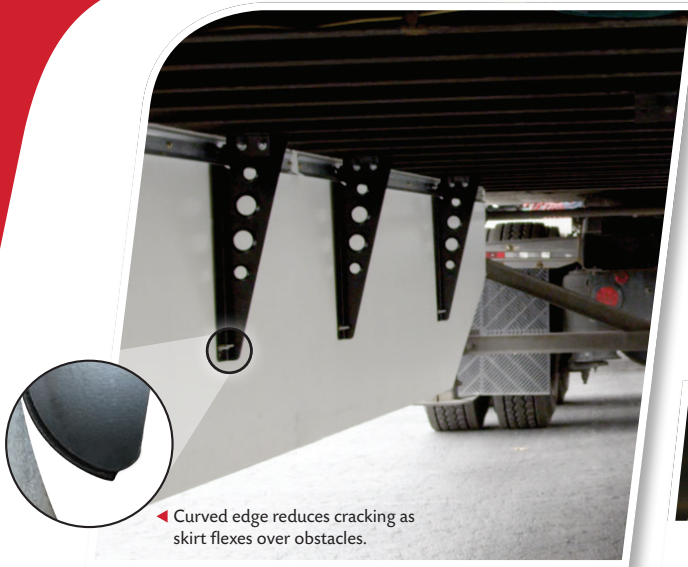

**FLEET
ENGINEERS**

Introducing the

AeroSaverTM 1

BY FLEET ENGINEERS

◀ Curved edge reduces cracking as skirt flexes over obstacles.

AeroSaver performance optimized for OEM installation.

The all-new **AeroSaver1** is the engineered solution designed specifically for OEMs to maximize profitability. This time saving one piece sideskirt model can be installed by a two-man team in just minutes. The revolutionary patented SkirtTrack and QuickMount brackets make the **AeroSaver1** trailer sideskirt the fastest to install in the industry. **Panels available to fit 48' or 53' trailers.**

Optimal for use at trailer OEMs!
Easy to install, bulk shipping options available. Contact us for pricing and availability!

EPA SmartWay Certified

The **AeroSaver1** is EPA SmartWay-certified advanced and meets the California Air Resources Board requirements.

Increased Fuel Economy

Fuel savings of up to 7% can be obtained by reducing drag from the underside of the trailers with **AeroSaver1**.

Flexible And Strong

The **AeroSaver1** features a lightweight blend of polypropylene and fiberglass material that is rigid enough to prevent movement in all driving conditions, yet flexible enough to yield when they encounter obstacles.
